## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita, US Patent No. 5,929,670 for reasons of record.

### **Response to Arguments**

Applicant's arguments filed 7/8/05 have been fully considered but they are not persuasive.

Regarding applicant comments directed to the rejection of claims 1-16 under 35 U.S.C. 103(a) as being unpatentable over Yamashita, Applicant argues "Yamashita's counters do not count output signal" and "the calculating and control part 13 without any further operation". These arguments are not persuasive because Figure 1 clearly shows the output of oscillator 11 connecting counter 15, i.e. the counter counts the output signal, the output of oscillator 11. The calculating and control part 13 performs the operation of providing control signal to the VCO 11, as disclosed in Yamashita (Abstract), "A calculating and control part (13) determines the accurate frequency of internal standard frequency signal source (11) from count values of both counters". Therefore, in claim 9, for clarification, a counter (13,14,15) counts two values by counting input signal (signal from 16) and output signal (output signal from 11)(which is output from an oscillator) and then outputs a third value (VCO control signal from 13).

Applicant further argues, "three values are obtained from/by one element, i.e. the counter. However, in Yamashita, the three values (15 counted value, 14 counted value and value of 13) are from three elements". This argument is not persuasive because the claim recites "a counter" which can be considered as a group functioning count operation, in this case, three elements 13,14,15 as a group functioning count operation just as one in this application.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
